

PERFECT PRACTICE

Designed for health. Built for life.

Pop-up rooms for extra consulting space

Do you have increased patient
intake due to COVID-19?

With our highly flexible pop-up rooms you can create more space in your medical practice to pre-screen, treat and isolate patients. These agile modular units are pre-made to your custom needs. Our highly skilled team can quickly install the rooms on site, with minimal disturbance to your practice. Alternatively, we can send the full kit with instructions for a local tradesman to install.

Installation for our pop-up rooms can be done within a day, during normal business hours. To maintain high levels of safety, we will work within an enclosed protected work area implemented by our installation team.

WHAT IS INCLUDED IN THE POP-UP ROOM?

- Rooms can come with a ceiling light and air conditioning system or alternatively they can be fitted up to the existing ceiling to take advantage of existing air-conditioning systems and lighting
- Rooms can have a vinyl floor installed if the existing floor is not suitable
- Rooms can come with a sink and pump, desk, chair or any other furniture that may be required
- Negative pressure systems are available for these rooms

HOW BIG ARE THE POP-UP ROOMS?

The pop-up rooms are available in a range of sizes, to suit your business needs. The standard sizes are:

- 2.4 x 2.4 for maximum use in tight existing areas
- 3.0 x 3.0
- 3.6 x 3.6
- Any combination of the above

We can service
Australia-wide
